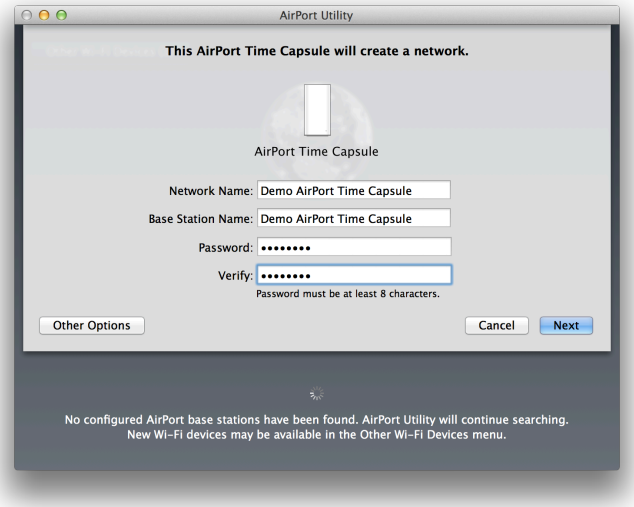
You'll need:

- A Wi-Fi enabled Mac
- AirPort Utility v6.3 or later

Use Software Update to get the latest version of OS X and AirPort Utility.

Time Capsule Setup

1. Plug the Time Capsule into a power source.
2. Open AirPort Utility, located in the Utilities folder in the Applications folder.
3. Select your AirPort Time Capsule and click Continue. If you don't see the AirPort Time Capsule choose it from the Wi-Fi status menu in the menu bar.
4. Wait for AirPort Utility to gather information about the Time Capsule.
5. Set up the Time Capsule as the screenshot below. Set the password to the current Demo Systems user password.



AirPort Utility
This AirPort Time Capsule will create a network.
AirPort Time Capsule
Network Name: Demo AirPort Time Capsule
Base Station Name: Demo AirPort Time Capsule
Password: ••••••••
Verify: ••••••••
Password must be at least 8 characters.
Other Options
Cancel
Next
No configured AirPort base stations have been found. AirPort Utility will continue searching.
New Wi-Fi devices may be available in the Other Wi-Fi Devices menu.

6. Dismiss the following window by pressing “Next”.
7. Select “Don’t send” in the “Diagnostics & Usage” window.
8. Click on the Time Capsule and select “Ignore” from all of the reported statuses.

9. Click “Edit”.
10. Choose the “Wireless” tab and set “Network Mode” to “Off”.
11. Click the “Update” button and dismiss any warnings by clicking “Continue”.
12. Wait for the Time Capsule to update its settings and to show a solid green light.
13. Your Time Capsule is now configured.
